

Competence creates Confidence.

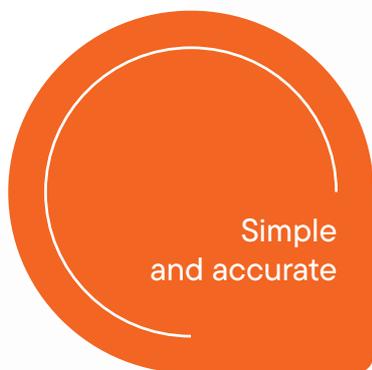

• Model no. H3017

CIRCOMETER

ISO 3126

Circometers are the easiest way to determine the outside diameter of pipes ranging from 15 to 3,100 mm.

Standard features

- Black surface coating for optimum reading contrast
- Vernier scale with 0.05 mm reading
- Calibration certificate
- Laser-scaled
- 100% final inspection
- Maximum quality thanks to use of high-quality steel strip
